LANGUAGES

Russian	native
English	fluent
German	intermediate

AI/ML engineer building *machine learning for medical imaging* — and shipping products end to end with AI.

Currently developing an ultrasound image classifier at NEXUS / ASTRAIA, on top of years of production medical software in Python. Full-stack background, materials-science roots, AI agents in my daily workflow.

EXPERIENCE

Nov 2021 — now
5 years

Medical Developer

NEXUS / ASTRAIA · Ismaning, Germany

- **Developing a machine-learning classifier for ultrasound images.**
- Designed and implemented the FMF (Fetal Medicine Foundation) risk algorithm in Python to assess pregnancy complication risks.
- Developed a Django web application to host and deliver the FMF algorithm.
- Built internal tools with Tauri to support design and development of the main medical software.
- Migrated CI/CD pipelines from Jenkins to Bitbucket Pipelines.

SIDE PROJECT

KinderCafe.app ↗

Smartphone app for finding child-friendly locations and events in Germany. Events are parsed from the websites of family and community centres by an LLM pipeline built on Gemini.

Gemini · Expo · Firebase · Cloud Run · Wagtail · PostGIS

SKILLS

ML & AI	**PyTorch,** TensorFlow, Gemini API, LangChain, MCP
Domains	Medical imaging, Image classification, LLM data pipelines
AI agents	Claude Code, Codex, OpenClaw
Languages	Python, TypeScript, JavaScript
Web	Django, FastAPI, React, Next.js, Expo
Infra & data	Docker, Terraform, GCP, CI/CD, PostgreSQL, Redis, pytest

EDUCATION

2016 — 2019
M.Sc. Advanced Materials and Processes
FAU Erlangen-Nürnberg, Germany

2010 — 2012
M.Eng. Materials Science
Volgograd State Technical University, Russia

2006 — 2010
B.Eng. Industrial Engineering
Volgograd State Technical University, Russia
